# SELECTION OF RESEARCH TOPIC

## •Passion:

- Choose a topic that genuinely excites you. Passion fuels motivation and perseverance throughout the research process.
- Consider areas you're curious about or deeply interested in. Your enthusiasm will drive your work.

## •Personal Interest:

- Reflect on your background, experiences, and expertise.
- Topics related to your field of study or personal experiences can be rewarding.

## • **Originality & Novelty:**

- Ensure your topic addresses a clear research gap.
- Evaluate whether your topic offers new insights or combines existing ideas uniquely.
- Consider taking a novel methodological approach.

## • **Value & Significance:**

- Assess the importance of exploring your research questions.
- Identify who will benefit from your study and how.
- Justify the significance of your chosen topic.

## • **Access to Data & Equipment:**

- Evaluate whether you have access to relevant data.
- 
- 
- 

## •Feasibility & Scope:

- Ensure your topic is manageable within your available time frame.
- Define the scope of your research to avoid overreaching.

## •Ethical & Social Considerations:

- Address any ethical implications related to your topic.
  - Consider the impact on vulnerable groups if applicable.
- 
- 
- 

# RESEARCH PROBLEM VS RESEARCH QUESTION

- **Research Problem:**

- Broad area of concern or issue.
- Identifies a gap in knowledge.
- Sets the foundation for research.
- Contextual and overarching.

- **Research Question:**

- Specific, focused query.
- Emerges from the research problem.
- Guides the study's direction.
- Narrow and precise.

# MEANING AND IMPORTANCE OF RESEARCH PROPOSAL

- A research proposal is a document written by a researcher that provides a detailed description of the proposed program. It is like an outline of the entire research process that gives a reader a summary of the information discussed in a project. Preparation of research proposal is needed because it facilitates the smooth sailing of the various research operations, thereby making research as efficient as possible yielding maximal information with minimal expenditure of effort, time and money.
- **Importance:**
  - **Research Focus:** The proposal helps identify the research focus by defining the scope and objectives.
  - **Planning:** It assists in research planning, ensuring a systematic approach.
  - **Clarity:** By presenting your idea clearly, it demonstrates your ability to communicate effectively.
  - **Resource Allocation:** It outlines the methodology, timeline, and feasibility, aiding resource allocation.

# MORE EXPLICITLY, THE RESEARCH PROPOSAL CONCENTRATES ON-

- What is the study about?
- Why is the study being made?
- Where will the study be carried out?
- What type of data is required?
- Where can be the required data found?
- What periods of time will the study include?
- What will be the sample design?
- What techniques of data collection will be used?
- How will the data be analyzed?

# CLASSIFICATION OF RESEARCH PROPOSALS

- **New Proposal:**

- A proposal submitted to a sponsor for the first time, or a proposal being resubmitted after having been declined by a potential sponsor

- **Revised Proposal:**

- This modifies a proposal that is pending or is otherwise unfunded, but not official declined by the sponsor. If a proposal has been declined, a new proposal must be prepared.

- **Supplemental Proposal:**

- A supplemental asks for an increase in support for a proposal that has already been funded. The requested increase would occur in the current budget period and may involve a broadening of the project's approved scope. Since additional funding is requested, a new budget is required.

- Continuation Proposal:

- A continuation applies to a multi-year award. The continuation proposal requests the already approved funds for the next phase (or next year) of the project. Typically, sponsors require a progress report and budget before releasing additional funds. These proposals only apply to project and budget years that were approved by the sponsor in the original award.

- Pre-proposal/Notice of Intent:

- The purpose of the pre-proposal is to peak the interest of a potential sponsor. It typically does not include a cost estimate and is not expected to result in an award. Interested sponsors will ask for a full proposal. Pre-proposals are usually in the form of a letter of intent or brief abstract. After the preproposal is reviewed, the sponsor notifies the

investigator if a full proposal is requested.

- Solicited:

- Solicited proposals are those that are written and submitted in response to the issuance of a ‘Request for Proposals’ (RFP), a document that identifies a specific research problem of interest to the funding agency for which they are specifically seeking a solution. Interested investigator then submits a ‘concept’ or ‘white paper’ briefly outlining their proposed solution to the problem. If the funding agency or company is interested, they may then request that the investigator submit a full proposal for consideration of funding.

- Unsolicited:

- Unsolicited proposals are those proposals that are submitted by an investigator in

# COMPONENTS OF A RESEARCH PROPOSAL

- **Background of the problem**

- **Problem Statement**

- **Research questions**

- **Research Objectives**

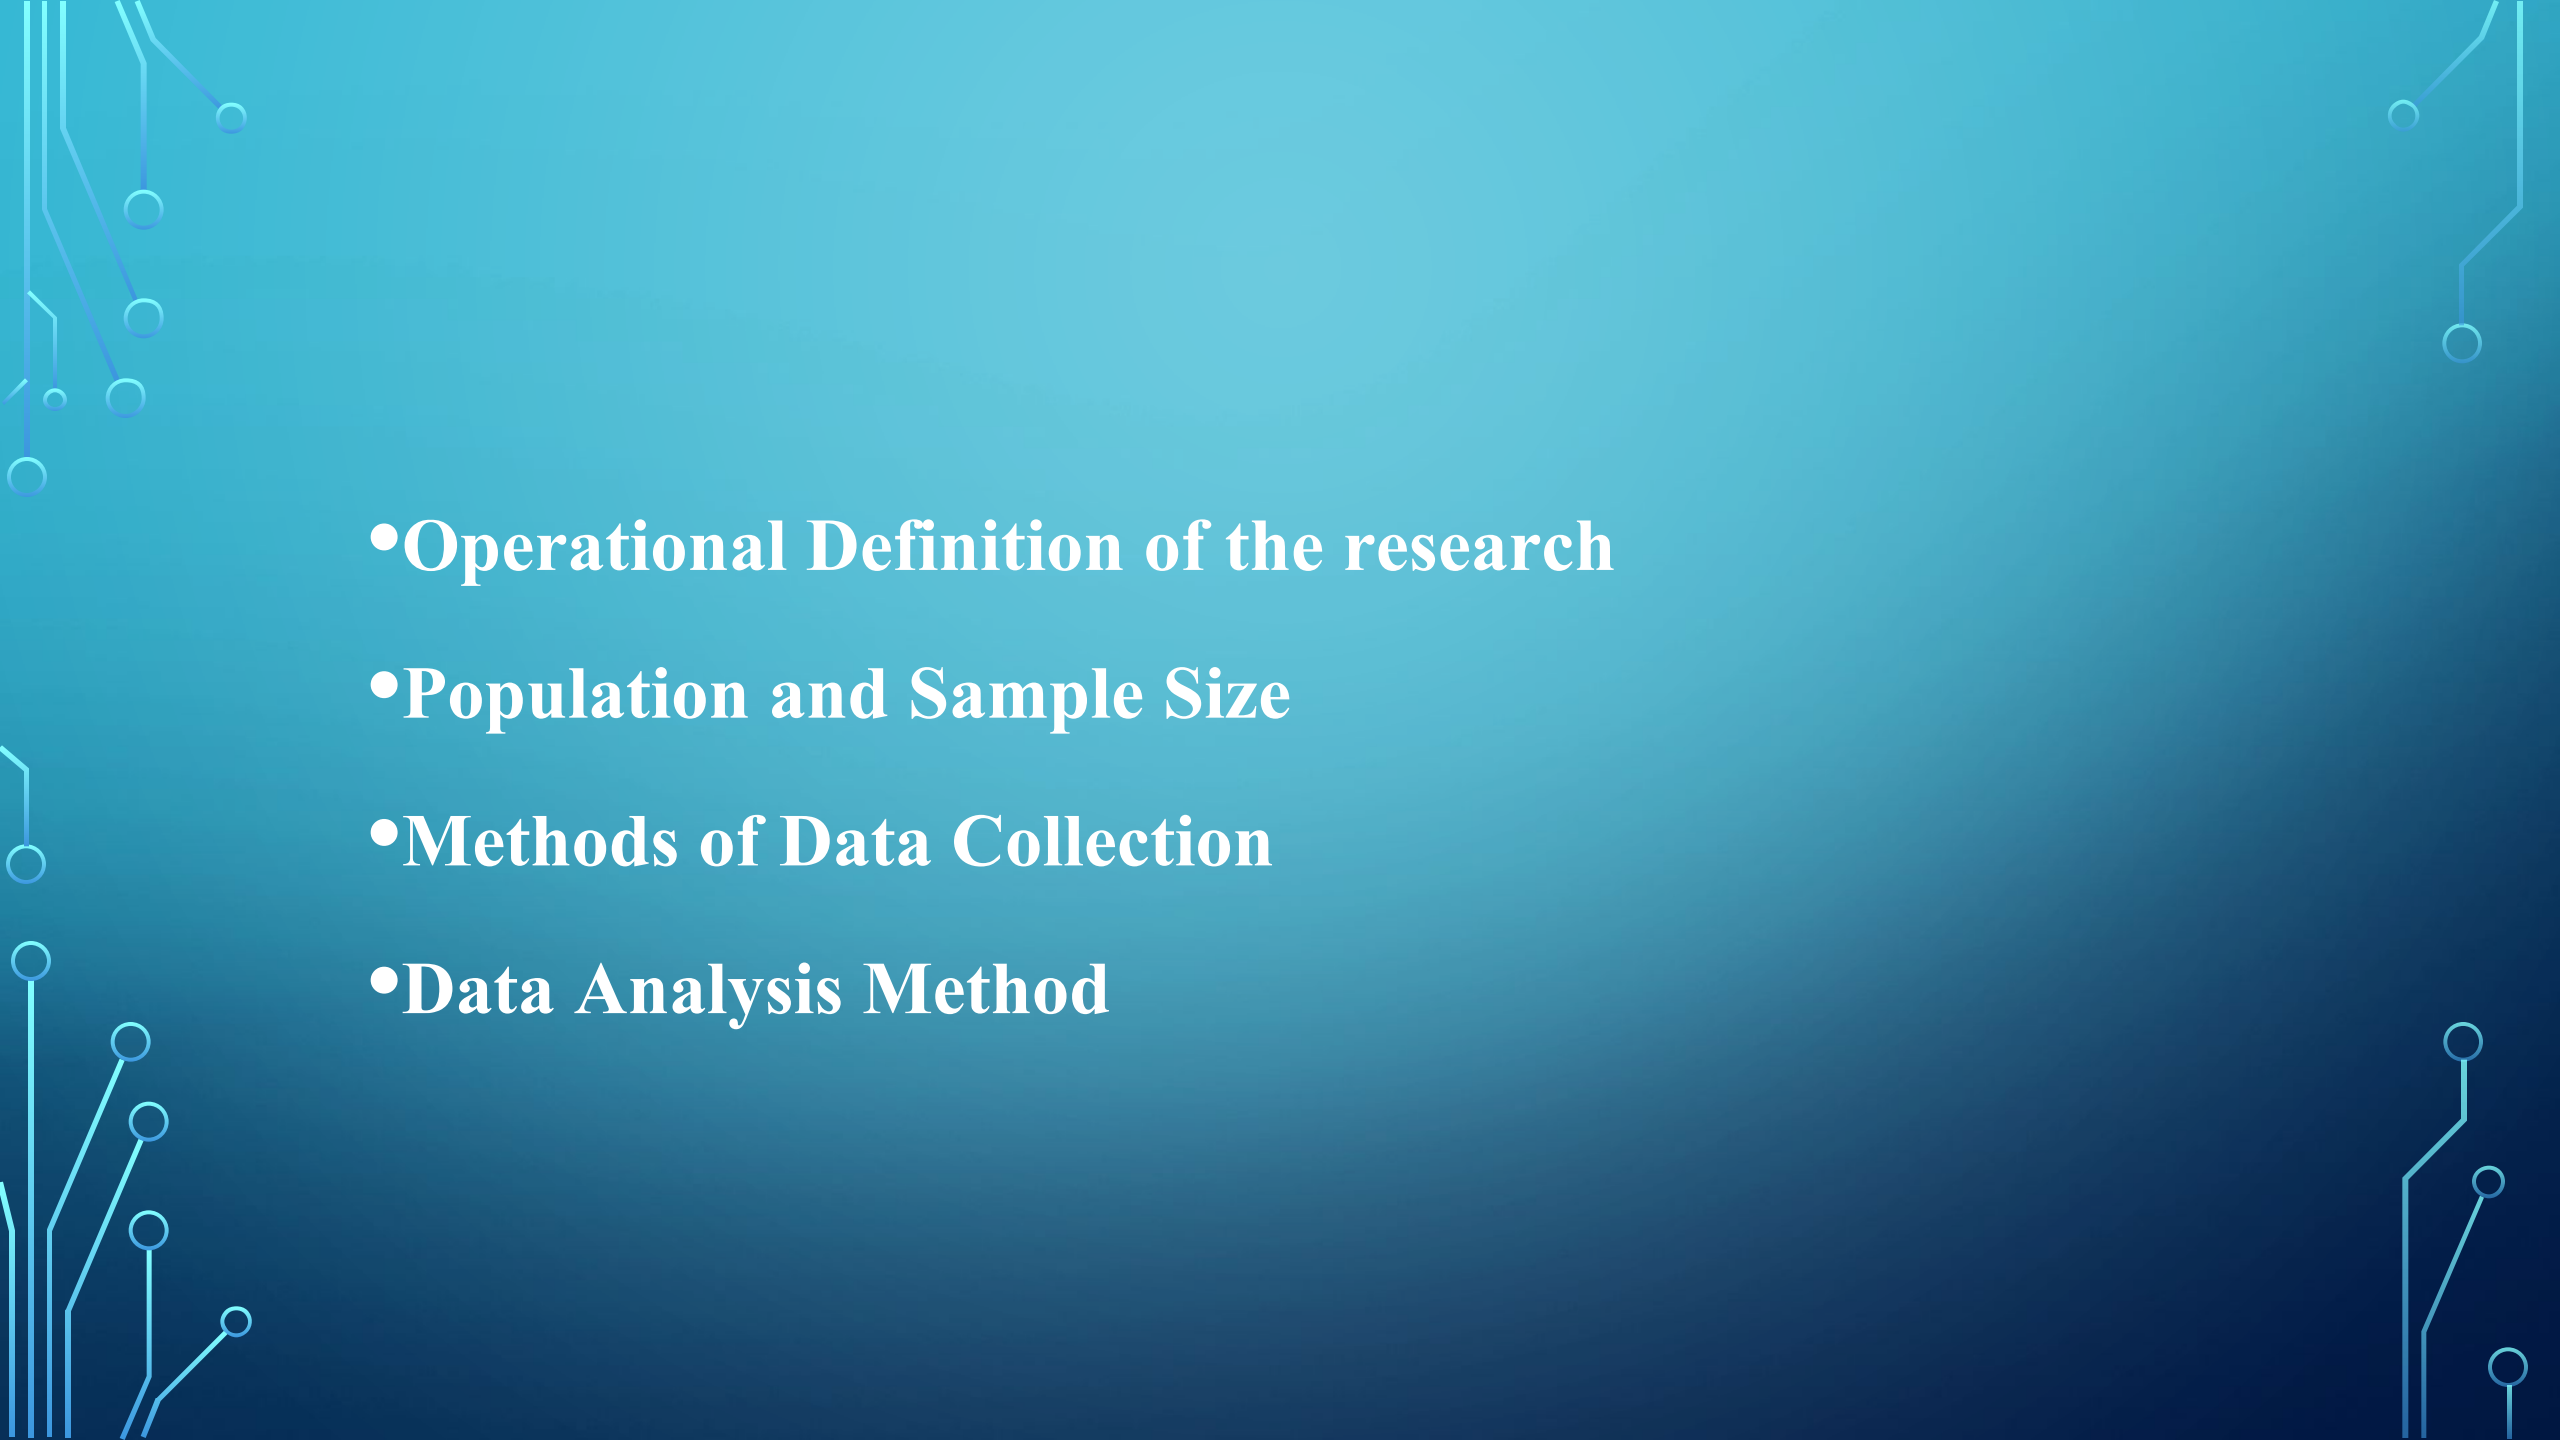

- **Rational of the Study**

- **For the Practitioners**

- **For the Academics**

- 
- **Preliminary Literature Review**
  - **Delimitation of Research**
  - **Research Methodologies and Approach**
    - **Introduction**
    - **Research Design**
    - **Research Philosophy**
    - **Research Approach**
- 

- 
- The background is a solid blue gradient. In the corners, there are decorative white line art elements resembling circuit boards or neural network connections, with small circles at the end of the lines.
- **Operational Definition of the research**
  - **Population and Sample Size**
  - **Methods of Data Collection**
  - **Data Analysis Method**

## •Ethics of Research

- Informed Consent

- Right to Privacy

- Honesty with Professional Colleagues

- Confidentiality/Anonymity

- 
- **Dissemination of the information**
  - **Budget of the Research**
  - **Deliverables and Program Schedule**
  - **Appendices**
  - **References**
- 

# APPENDICES

- Copies of all instruments (if using a questionnaire) must be included in the appendix.
- Consent forms
- Assent forms
- Parental Consent Forms
- Relevant Letters to Organizations
- Data collection forms

# MANAGER-RESEARCHER CONTRIBUTION IN DEVELOPING A RESEARCH PROPOSAL

- **Manager Contribution:**

- Identifying research needs and setting objectives.
- Allocating resources and budgeting for the research.
- Establishing timelines and deadlines.
- Coordinating with different departments for support.
- Ensuring compliance with organizational policies.
- Reviewing and approving the research proposal.
- Monitoring progress and providing feedback.

## •Researcher Contribution:

- Conducting literature review and identifying research gaps.
  - Formulating research questions and hypotheses.
  - Designing research methodology and selecting appropriate tools.
  - Collecting and analyzing data.
  - Interpreting results and drawing conclusions.
  - Writing the research proposal with detailed methodology.
  - Ensuring ethical considerations are addressed.
  - Revising the proposal based on feedback from the manager and other

- 
- 

# EVALUATION A RESEARCH PROPOSAL

- **Clarity of Research Question:**

- Clearly defined research questions or hypotheses.
- Relevance and significance of the research problem.

- **Literature Review:**

- Comprehensive review of existing literature.
- Identification of research gaps.

- **Research Objectives:**

- Clearly stated and achievable objectives.
- Alignment with the research problem.

## •Methodology:

- Appropriateness of the research design and methods.
- Detailed description of data collection and analysis procedures.
- Feasibility and practicality of the methodology.

## •Originality and Innovation:

- Novelty of the research approach.
- Potential contribution to the field.

## •Ethical Considerations:

## • **Budget and Resources:**

- Realistic and detailed budget.
- Adequate resources and funding availability.

## • **Timeline:**

- Clear and realistic timeline for completing the research.
- Identification of key milestones.

## • **Impact and Implications:**

- Potential impact of the research findings.
- 

## •Quality of Writing:

- Clarity, coherence, and organization of the proposal.
- Proper grammar, spelling, and formatting.

## •Feasibility:

- Practicality of conducting the research within the proposed constraints.
- Availability of necessary tools and resources.

## •Reviewer Feedback:

- Consideration of previous feedback and suggestions.
- 

# ETHICAL GUIDELINES

- **Informed Consent:**

- Ensuring participants understand the research purpose, procedures, and risks.
- Obtaining voluntary participation through written consent.

- **Confidentiality:**

- Protecting participants' personal information.
- Ensuring data is stored securely and only accessible to authorized personnel.

- **Anonymity:**

- Keeping participants' identities anonymous in publications and reports.
- Using codes or pseudonyms instead of real names.

## • **Non-maleficence:**

- Avoiding harm to participants.
- Minimizing any potential risks or discomfort.

## • **Beneficence:**

- Maximizing potential benefits of the research to participants and society.
- Ensuring the research has a positive impact.

## • **Respect for Persons:**

- Treating all participants with dignity and respect.
  - Acknowledging their autonomy and right to withdraw at any time.
- 
- 

## • **Justice:**

- Ensuring fair and equal treatment of all participants.
- Avoiding exploitation or discrimination.

## • **Transparency:**

- Providing clear and honest information about the research.
- Disclosing any potential conflicts of interest.

## • **Data Integrity:**

- Ensuring accuracy and honesty in data collection, analysis, and reporting.
  - Avoiding fabrication, falsification, and plagiarism.
- 

## • **Responsible Publication:**

- Publishing results in an honest and transparent manner.
- Giving proper credit to contributors and acknowledging sources.

## • **Compliance with Regulations:**

- Adhering to institutional, national, and international ethical guidelines.
- Obtaining necessary ethical approvals from relevant committees.

## • **Participant Well-being:**

- Providing support and resources for participants if they experience distress.
  - Ensuring their well-being throughout the research process.
-
